

PROFESSIONAL SUMMARY

Project Management professional with experience delivering enterprise banking and security solutions in Agile environments. Skilled in cross-functional team coordination, sprint planning, Jira backlog management, stakeholder communication, release planning, and risk mitigation. Proven ability to drive secure and timely project delivery while bridging business requirements with technical execution.

EDUCATION

Vasantdada Patil Pratishthan’s College of Engineering, Mumbai, BE, GPA: 8.9/102019 — 2023

EXPERIENCE

Junior Executive - Project Management

Odyssey Technologies

- Coordinated cross-functional teams across Security, Development, QA, and Infrastructure to streamline certificate management workflows, reducing release cycle delays by 20%.
- Managed Jira backlogs, sprint planning, and user story tracking across Agile delivery cycles, improving sprint visibility and stakeholder alignment.
- Facilitated requirement gathering sessions with product owners, business teams, and internal stakeholders to define project scope, priorities, and delivery timelines.
- Supported release management activities including dependency tracking, deployment coordination, and QA validation for enterprise applications.

July 2023 - Present

On-site

PROJECTS

SnorkelBXV5

- Coordinated end-to-end delivery of enhancements for SnorkelBXV5, enabling secure B2B communication and enterprise file exchange across multiple platforms.
- Collaborated with Development, QA, Security, and Infrastructure teams to ensure timely execution of project milestones and release deliverables.
- Managed PKI, SSL/TLS, and secure SFTP integration coordination to ensure compliance with enterprise security standards.
- Coordinated incident resolution and production support activities, ensuring faster issue tracking and recovery for critical enterprise services.

July 2023 - Present

I-Pay2Corp

- Led cross-functional coordination across Development, UI, Network, Infrastructure, Database, BTO, and AO teams for successful delivery of the I-PAY2CORP platform within an aggressive 8-month timeline.
- Drove Agile project execution by coordinating sprint planning, backlog prioritization, release tracking, and dependency management across multiple teams.
- Facilitated collaboration between UI, business, and technical teams to deliver customer-centric dashboards for public and private sector banking clients.
- Coordinated onboarding support and delivery activities for government and enterprise customers, ensuring timely implementation and stakeholder alignment.
- Worked closely with overseas teams to improve application reliability, optimize multithreaded modules, and enhance overall system performance. Leveraged GenAI tools including Notion AI, Gamma, ChatPRD, and Lovable for requirement documentation, sprint tracking, stakeholder presentations, roadmap planning, and project collaboration.

Sep 2024 - Present

SKILLS

Product Management

Agile, Scrum, Jira, Sprint Planning, Backlog Grooming, User Stories, Stakeholder Management, Risk Management, Release Planning, Dependency Tracking, Roadmapping, Requirement Gathering

Languages

SSL/TLS, PKI, SFTP, MFT, SQL, Python, Bash Scripting, Figma, Excel, WinSCP

Collaborations and AI Tools

Notion AI, Gamma, ChatPRD, Lovable, GitHub, ChatGPT, Gemini

ACHIEVEMENTS

- Reduced release coordination delays by 20% through improved sprint tracking and stakeholder alignment.
- Successfully coordinated enterprise banking platform delivery involving multiple cross-functional teams and external stakeholders.
- Supported Agile transformation initiatives to improve sprint visibility, release planning, and delivery efficiency.
- Improved production incident coordination and reduced service recovery timelines for enterprise applications.
